Baptist Cancer Institute • 1235 San Marco Blvd.

904.202.7020

Thursday, November 19, 2009 • 4 – 7pm

Dedication ceremony at 5:30

*Refreshments will be provided*

Baptist Health invites you to learn about Novalis Tx™, a state-of-the-art radiosurgery system that offers **fast**, accurate, minimally invasive treatments for cancer and other conditions in the brain, head, neck and body. Novalis Tx is available only at Baptist Cancer Institute in Northeast Florida.

In just 10-20 minutes and often in a single session, Novalis Tx delivers **precisely focused** high-energy radiation to a localized area to treat non-cancerous and cancerous conditions that often cannot be treated using traditional surgery, including:

Brain metastases • Spinal, liver, lung and prostate tumors • Low- and high-grade gliomas • Neurofibromas • Vestibular schwannomas • Uveal melanomas • Arteriovenous malformations (AVM) • Trigeminal neuralgia • Cavernous angiomas • Intractable seizures • Parkinson's disease

Novalis Tx is **patient-friendly** because it's non-invasive, painless and designed for comfort.

## Novalis Tx™

Surgery without a trace. *Fast. Focused. Friendly.*

*Depend On Us For Life.™*

Novalis Tx is radiosurgery for tumor treatment. Not appropriate for all patients; multiple treatments may be required; results may vary. All rights reserved. ©BrainLAB AG.
